James Langdon
Gravity All Around (Rotated)

An unauthorized but admiring reissue of the 1963 educational book for children, *Gravity All Around* by Tillie S. Pine and Joseph Levine. In this new version each element of content has been individually rotated so that gravity goes not *down* the graphic space of the page, but *inward*, into the binding and the three-dimensional space of the book-object. Offset printed, original two-color separations carefully recreated.

Rollo N°61

46 Pages

15 × 21 cm

Something makes these things happen.

Do you know what it is?

It is the pull of the earth.

The earth pulls you, the ball, the ruler—toward itself.

The earth pulls everything toward itself.

We call this pull—

GRAVITY

You cannot see gravity, but—
it is there!

So—
when you or your ball or your ruler comes down—gravity makes it happen.

What do we mean when we use the words, "up" and "down"?

When we say things go "up"—
we mean that they go *away* from the earth.

When we say things come "down"
—we mean that they come *toward* the earth.

Jump up!
You come right down.
Have you ever wondered why?

Throw a ball into the air!
It soon comes down.
Have you ever wondered why?

Lift your ruler up into the air!
Let it go! It drops to the floor.
Have you ever wondered why?
